THREE MODEL SIZES: No. 10, No. 20, No. 30

AVAILABLE IN

BOTTOM OR BLOWER DISCHARGE TYPE

No. 20 BOTTOM

No. 10 BLOWER

BASIC HAMMER MILLS

(includes one screen)

- Mill whole wheat flour 30 lb. to 50 lb./hr.
- Grind coarse shelled feed corn from 2000 lb. to 4000 lb./hr.
- Make corn meal 150 lb. to 300 lb./hr.
- Use the Bottom Discharge type to process wet or moist material such as fruits or vegetables.
- Coarse grind fruits from 1000 lb./hr. to 4000 lb./hr.
- Bottom Discharge Mills are designed for use where Blower type units are not practical. In addition to handling most dry material the Bottom Discharge type mill also grinds wet, pulpy product.
- Note: capacities vary depending upon Mill and screen size. (Please consult factory.)

Uncomplicated design with range of uses and installations

Top chamber tilts open for inspection and maintenance

Heavy ribbed cast iron breaker plate aids in the grinding and milling process

Rotor shaft 1-3/16" dia. steel with flange mounted ball bearings and grease fittings

Hardened steel hammers, free-swinging, four rows installed in staggered arrangement

Hammers are reversible for maximum wear

Milling chamber has radius tracks for sizing screen

The Bottom Discharge feature permits easy installation over a pit, hopper or similar and is completely open for full and quick through-put

The Blower Discharge Mill features a fan which helps in fast grinding by pulling material into the rotating hammers and through the screen

The Blower fan moves material to another area or upper level to over 20 ft. elevation

The Blower Discharge unit is well suited for dry, light weight material such as most grains, feathers, foam plastic, feed, dry bedding and much more

The larger No. 30 Blower Discharge unit has a steel feed auger in the lower chamber to quickly and efficiently move its increased volume of ground material

All Hammer Mills are made of durable cast iron and formed steel

All are finished in standard red enamel

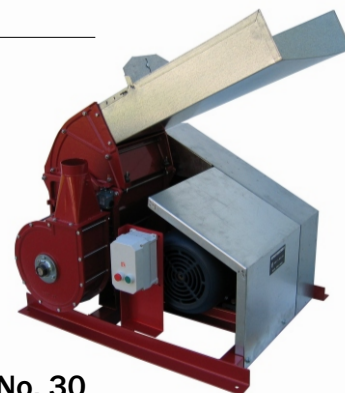

STANDARD PACKAGE INCLUDES:

- Hammer Mill with stock screen (your choice)
- Standard Feed Table
- Base Frame with motor mount (formed & welded steel)
- Electric Motor for *230/460V-3 ph-1750 RPM operation
- On/off control with O.L. protection & enclosure
- 25 ft. power cord with plug
- All pulleys with v-belt drive for proper speed
- Safety Limit Switch (to stop motor if mill is opened)
- Safety Belt Guard with motor cover
- PVC Discharge Skirt (for Bottom Discharge units)
- All ready for operation
