

## G-SERIES PRESSURE DESTONER

### About This Product

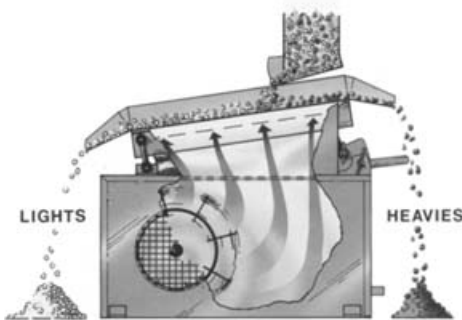

**...the destoner other destoners are compared to!**

The basic principle of the destoner is to separate dry granular material into two specific weight fractions, such as glass, stones and metal from a large amount of light product.

Forsberg's Destoners are constructed of heavy gauge steel and are driven by a unique eccentric drive which is counterbalanced for years of trouble-free operation.

The Forsberg's G-Series Pressure Destoners are available in six sizes, with several different deck configurations and numerous options to fulfill your specific needs.

Contact Forsberg's for your free product evaluation to ensure complete customer satisfaction prior to your purchase.
